

TEMPLATE V: ANALYSIS MATRIX FOR INDICATOR RATING AND CRITERIA ANALYSIS

Safety	Criteria	Analysis by criteria	Indicator No.	Indicator	Analysis by indicator of existing dsts (secondary data, klls, FGD'S	Source of analysis	Relevant international standards, or national standards, laws or policies	Existing interventions in relation to this indicator (incl. geographical and population group focus.	Indicator measurement for displaced/returnee population.	Indicator measurement for the host population	Rating of indicator	Reason for rating (and explanation of any changes made during the validation process		
					Summary analysis of findings for each indicator	Different sources (secondary data review, KII, FDG) that were used to measure the indicator	Self explanatory	Interventions by govt, UN, NGOs, donors, communities in relation to each indicator, as well as the location of these interventions and the population group (IDP/returnee/refugee/host population) they support	Specific % for each indicator for the displaced/ returnee population. If the analysis is looking at both displaced and returnee populations then there should be 2 separate columns	Specific % for each indicator for the host population.	Red, Orange, Green or White	Explanation as to why the indicator was rated green, orange, red or white.		
PHYSICAL SAFETY	Protection, Safety & Security, Social cohesion	Summary analysis of findings from the criteria analysis	1	% of target population who were subjected to physical, psychological or sexual violence in the previous 12 months										
			2	% of target population facing restrictions on their freedom of movement										
			3	Level of confidence in police and informal/formal justice mechanisms among target population										
			4	% of target population feeling unsafe in their place of residence										
			5	% of stigmatization due to displacement status										
			6	% of acceptance by host community										

MATERIAL SAFETY	Access to basic services	7	Food consumption score											
		8	Prevalence of global acute malnutrition among target population											
		9	% of households in target population living in adequate housing condition											
		10	% of target population with daily access to safely managed and sufficient drinking water											
		11	% of target population with access to safe toilet facilities											
		12	% of target population who used health care services (including mental health care) the last time they needed it in the past 12 months											
		13	Primary/secondary school net attendance ratio											
		14	Existence of legal, administrative or discriminatory barriers to accessing national social protection programs											
	Access to job creation and employment opportunities	15	Existence of legal/administrative obstacles to employment or economic activity											
		16	Unemployment rate (% of total labor force)											
		17	% of target population living below the national poverty line											
	Effective and accessible mechanisms to restore housing, land and property	18	Existence of accessible mechanisms to ensure access to housing, land and property rights for target group											
		19	% of target population with lost HLP who have had their claims resolved											
		20	% of target population with secure tenure over land											

LEGAL SAFETY	Access to personal and other documentation	21	Existence of accessible mechanisms for obtaining/replacing documents								
		22	% of target population currently in possession of birth certificates, national ID cards or other personal documents relevant to the context								
	Family reunification	23	Existence of accessible mechanisms to reunite separated family members								
		24	% of UASC and other separated vulnerable persons who have been reunified with their families								
	Participation in public affairs	25	Existence of legal or administrative obstacles that prevent people from 1) voting or 2) being elected								
		26	% of target population who believe decision-making is inclusive and responsive								
	Access to effective remedies and justice	27	% of target population who accessed mechanisms to provide remedies for violations suffered (out of those who needed them)								
		28	% of target population who consider that they have been effectively remedied for violations suffered (out of those who accessed mechanisms to provide remedies)
