

ReDSS Strategy (2021-2023) – Intervention Logic

Pillars	Research and analysis	Capacity development	Policy dialogue	Coordination
Goal	Improved durable solutions policies and programming that increases the potential of displacement-affected communities to integrate sustainably and to live safe, dignified and productive lives in East and Horn of Africa			
Overall objective	To support a collective research agenda and increase use of research and analysis to inform durable solutions policy and programming	To strengthen capacity, collective monitoring and learning on durable solutions and leverage members' expertise	To facilitate and undertake constructive and influential policy dialogue at local, national and regional levels	To bring members and partners together to learn and coordinate on research, policy and practice on durable solutions
Outcome 1	Support a collective agenda on operational research and analysis to inform durable solutions policy and programming	Strengthen ReDSS members and partners' capacity on durable solutions programming and policy processes	Strengthen ReDSS policy reach and impact through serving as a platform for engagement and dialogue informed by evidence and learning	Foster inclusive, trustful and collaborative working approaches drawing on the expertise and capacities of ReDSS members and partners at local, national and regional levels
Output 1.1	Conduct operational research, political economy and solutions analysis to address knowledge and practice gaps	Conduct trainings to strengthen the capacity of practitioners and policy makers	Bring members, partners and stakeholders together to create the space to discuss durable solutions	Amplify voices from the field in a coherent and collective way and strengthen partnerships with national actors
Output 1.2	Support research processes to contribute to a collective agenda to inform durable solutions policies and programming	Leverage members' expertise to support peer learning and mentorship between stakeholders	Engage proactively in key policy processes at local, national and regional levels to advance the durable solutions agenda	Effectively harness and coordinate the expertise, capacity and influence of ReDSS members to strengthen ReDSS performance and collective accountability
Outcome 2	Increase use of relevant research and analysis by ReDSS members and partners	Enable collective monitoring and learning on durable solutions programming	Provide timely, evidence-based policy advice and analysis that orient policy processes towards solutions to displacement	Pursue strategic partnerships and collaboration at local, national, and regional levels with stakeholders to advance durable solutions
Output 2.1	Organise learning events and workshops bringing stakeholders together to promote uptake of evidence	Support members and partners to develop collective tools to measure durable solutions programming progress and impact	Develop and share joint messages, policy briefs and other analysis products for use by ReDSS members and partners to inform and influence policy processes	Develop working relationships with researchers, humanitarian and development partners and donors to advance durable solutions
Output 2.2	Ensure all research and analysis are easily accessible and tailored to targeted audiences	Support cross learning on durable solutions mainstreaming and integrated programming between countries, contexts and stakeholders	Provide timely support to all key partners on the design, development and monitoring of solutions strategies and policies	Work with partners towards collective outcomes and joint accountability in the search for durable solutions
